Dear Joe,

One of Jim Thompson's and my students, Doug Rumble, would very much like to obtain a small amount of the Pizzo Forno staurolite (no. 2) which was analyzed by Juurinen. He wants it mainly as a reference check on his present staurolite calibration curve for the probe. Would you be able to spare some, if you have any of the material? Furthermore, would you be able to give us the present address of Juurinen. Rumble says he can not locate his present whereabouts in any reference.

Thanks very much for your help,

Yours sincerely,

Kare

Cornelis Klein

CK:sw

Doug, was a little of the crystal only. File the rest in a box with the other standards and copy Smith's probe analysis onto a card for the file of standard reanalysis.

Sorry that I do not have any material. I suspect Juurinen is at the Finnish Geological Survey but I may be quite wrong. Here is a crystal from my sample. If Rumble has time, I would appreciate his reanalyzing it as a check on my work.

Best regards.

Joe Smith
